In Lefferts Manor size counts. This three storied, twenty-five foot wide Victorian is just as beautiful today as when the Wyckoff's owned it. What is truly amazing is that the details are stunning, considering that it's estimated to have been built around 1910, chances are it was built in the late 1800's. From the Greek columns, Pocket doors, wainscoting in the living room, hardwood inlay floors throughout the home, working gas-burning fireplace, there are so many other wonderful details in this home I don't have enough space to list them. The master suite -- one of five bedrooms-- is large with a walk-in closet the size of a small studio. The other bedrooms are of good size and one with a fireplace. The basement is finished and contains a home theater room with a hundred inch drop down screen, to the rear there is a hot tub room and shower. For those steamy hot summer days this home has central air and if that isn't cool enough there is an above ground pool in the garden, to help keep your cool there is a driveway and garage -- you know what parking is like in New York City. If you don't have a car this home is surrounded by subways. Q, B, S, 2, 5 and then there is Prospect Park, Tennis courts, 70 million dollar newly built Ice skating ring, audubon center, lake, hiking paths, zoo, Botanical Gardens, Brooklyn Museum. You may call it home, I'll call it living the dream.
